No Election.

Washington (Pa) Herald. A good-looking, well-to-do and popular young bachelor of Silverton was being teased by the young ladies of a club for not getting married. He said: "I'll marry the girl of your club whom, on a secret yote, you elect to be my wife." There were nine members of the club. Each girl went into a corner and used great caution in preparing her ballot and disguised the handwriting. The result of the yote was that there were nine yotes cast, each girl rethat there were nine votes cast, each girl receiving one. The young man remains a bachelor, the club is broken up and the girls are all mortal enemies, united in the one determination that they will never speak to that nasty man again.

A New Process

The Lemon, the Orange, the Vanilla, contains more or less of a delicate flavoring substance, and the separation of this substance in a manner so as to retain all its freshness, sweetness and naturalness, requires the greatest experience and care.

Dr. Price's Delicious Flavoring

Extracts are prepared by a new process that gives to them the natural flavoring qualities, and are so concentrated that it requires but a small quantity to impart to a cake, pudding or cream, the delicate flavor of the fresh fruit. The leading chemists endorse their purity. The United States Government uses them.

HEALING THE AFFLICTED.

Scientific Skill and Experience as Exemplified by Dr. A. B. Barker.

A Wonderful Array of Successful Operations

in the Treatment of Diseases of the Eye, Ear, Throat and Lungs.

The other day a Journal reporter, engaged in prosecuting an inquiry, called upon Dr. A. B. Barker, the eminent specialist in diseases of the eye, ear, nose and throat. The Doctor's apartments are at No. 4 West Washington street, upstairs, in the building at the northwest corner of Meridian and Washington streets, and while awaiting the Doctor's leisure the reporter had opportunity to observe the surroundings. These apartments, waiting and operating-rooms, are handsomely titted up, and are in delightful contrast, by reason of their cozy and comfortable appearance, to the usual thing in the way of physicians' offices. The reporter was pleased to note that Dr. Barker is the graduate not only of first-class European medical institutions, but of the best colleges in this country. These diplomas speak for themselves and are credentials that any practitioner might well be proud to possess. More than this, Dr. Barker, who has had twenty-eight years' experience in the active practice of his profession, has been for many years a teacher in one of the leading medical colleges of Cincinnati and still holds a professorship in that institution.

His success in this city, following his previous achievements before coming here, have made him known all over the State, and he is receiving patients from far and near. It is a recognized fact that he has performed cures while here that have been almost marvelous, in cases where leading physicians have failed.

While much of Dr. Barker's success is due to his skill, long experience and general knowledge, he is no doubt greatly aided by the fact that he is better equipped than any physician in the West to treat cases of disease involving the eye, ear, nose or throat. His array of instruments and appliances would certainly excite the admiration and envy of any physician in the land. These appliances, collected during the past arter of a century in Europe and America, represent all that is most worthy in the inventive skill of surgery applied to the specialties he treats, and have a specific value far beyond what they cost. Many of these delicate and useful instruments can be found in no other collection in this country, and the Doctor, as he exbibited them to the reporter, handled them as tenderly as though they were things of

Dr. Barker's treatment is entitled to special mention, from the fact that his skill is such as to enable him to engage the most difficult and sensitive cases without pain. thus divesting the patient of fear and sparing the shock that in the treatment by many practitioners brings disastrous resuits to what they term "successful operations." With Dr. Barker no operation is successful that does not effect a thorough and permanent benefit, and is brought about without needless pain to the patient, He was pleased to give the reporter a large amount of valuable information re-

garding his specialties, and spoke entertainingly of the achievements of science in the treatment of the eye. Here he opened one drawer after another, disclosing hundreds of artificial eyes. Of these wonderful imitations of the natural organ Dr. Barker has a greater and better selected than all the stocks in Indiana put together would afford.

Dr. Barker's fees are so reasonable that people of the most moderate means are not shut out from enjoying the benefits of his skill. During the few months he has been in this city he has made the following record of cases treated. This list includes of course only the most important cases:

68 operations for cross-eyes. 22 operations for cataract. 6 removals of the tonsils. 3 operations on the eye-lide. l operation for hair-lip. 400 eyes fitted with glasses. 22 cases of artificial eyes. 9 cases granulated lids.

22 cases nasal catarrh and throat troubles. It is well worth the while of any one wearing glasses to go to Dr. Barker and get spectacles that are actually suited to them. He first examines the eyes as an oculist to discover just what they need and then fits them as an optician. The cost to the patient is no more than the value of the gilasses, whilethe comfort in having secured a perfect fis of the utmost impor-

It is a pleasure to talk to a professional man like Dr. Barker, who thoroughly understands the science of his profession, all the latest achievements in his specialties in Europe and America, and who can converse upon these wonderful things in such a way as to make them entirely clear to every one.

KRAKAUER PIANOS.

If you will call and examine these exquisite Pianos, and examine into their merits, and ascertain the low prices and easy monthly payments upon which they are sold, you will buy one.
